New **RLID Maps** Features

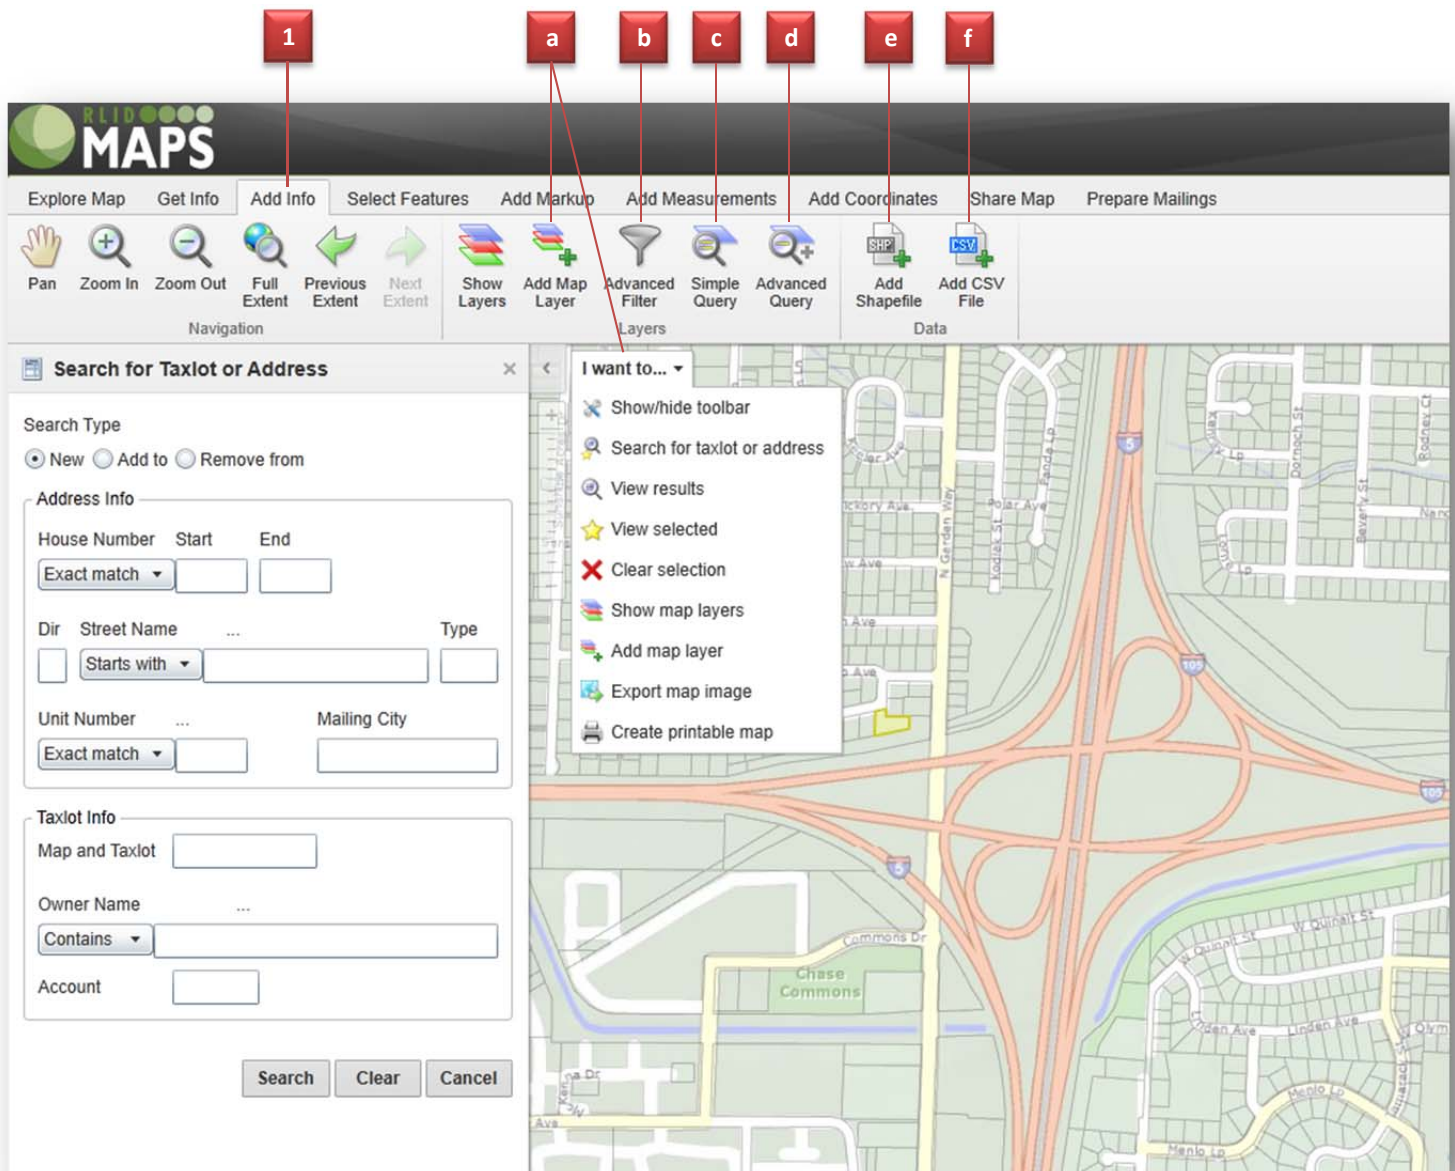

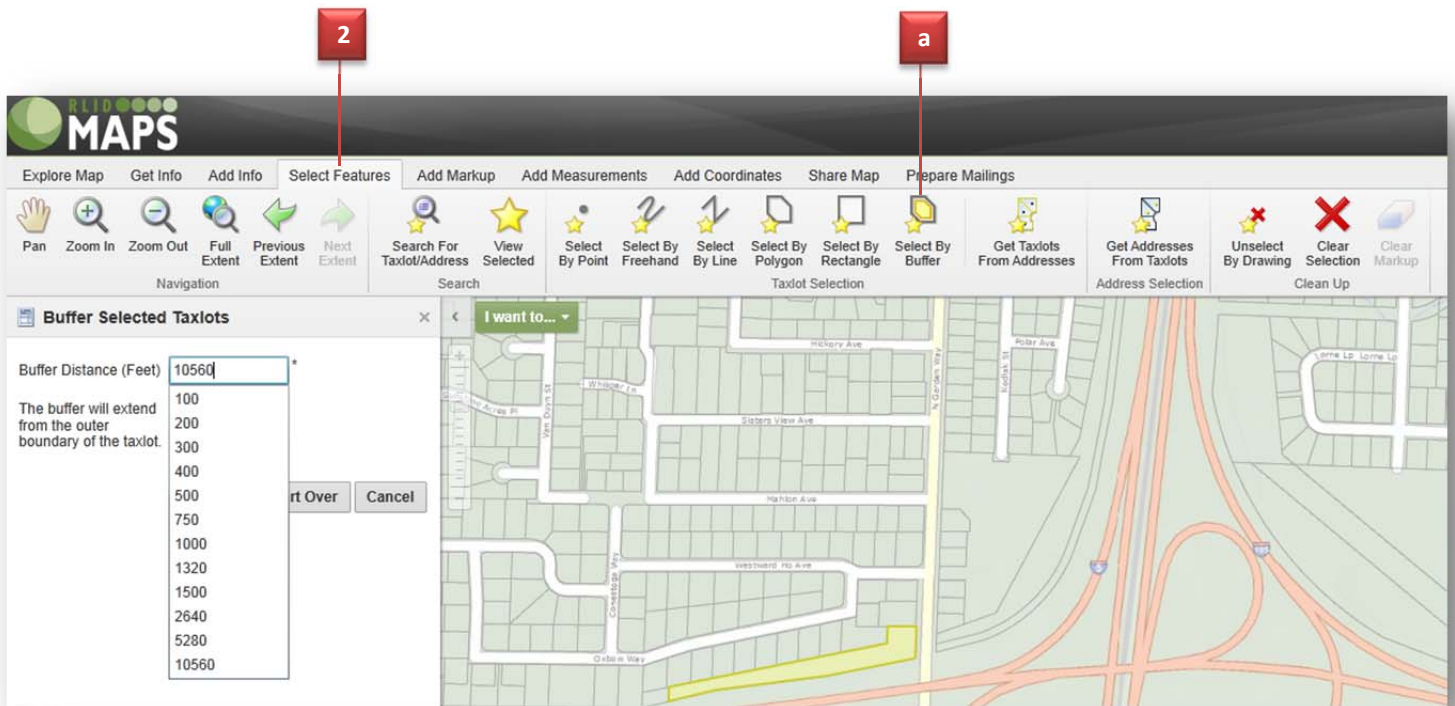

New navigation features in Map Viewer:

1. New **Add Info** tab has tools for allowing user-added feature layers and searching and filtering those layers
   a. **Add Map Layer** (toolbar and "I want to…" menu)
   b. **Advanced Filter**
   c. **Simple Query**
   d. **Advanced Query**

   Also, the **Add Info** tab has tools to allow you to add small shapefiles or CSV point files as graphic layers
   e. **Add Shapefile**
   f. **Add CSV File**

2. In the **Select Features** tab

   a. The **Select by Buffer** tool now allows searches up to 2 miles (10560 feet) or 20,000 features.

      All searches and selections allow results for up to 20,000 features to be returned.

3. **Add Markup** tab
   a. Includes the new **Extract** tool to allow you to extract markup as an Esri shapefile enclosed within a downloadable zip-file.
4. Links to **Bing Maps** and **Google Maps** in the results and map tips.

Other changes:

- On the **Explore Map** tab, we have removed the **Layer Drawing Order** tool.
